-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Drawings*

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Figure 1 is objected, it should be designated by a legend --Prior Art-- (see the Background of the current application, page 3).

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, last paragraph, the term "that sets the available output power from the fuel cell" is unclear. What does applicant want to refer to in this paragraph? The sentence is confusing and term "the available output power" is lack antecedence basis.

With respect to claim 13, last paragraph, the term "that sets the available output power. from the fuel cell" is unclear. What does applicant want to refer to in this paragraph? The sentence is confusing and term "the available output power" is lack antecedence basis.

The period (.) after the term "available output power" in line 13 should be removed.

With respect to claim 18, the term "the available output power from the fuel cell" is lack antecedent basis.

***Allowable Subject Matter***

3. Claims 1-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
4. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-22 are indicating allowable over the prior art of record (if amendment overcome 112 rejection above). None of the prior art of record taken singularly or in combination to teach or suggest the claimed combination such recited in the claims, particularly the operation of a load following algorithm providing a buffer of fuel input and air input to the fuel cell so that the fuel cell is able to immediately generate additional current above the draw current in response to transients/ or an increased demand from the system load; load fuel cell controller including a first order lag filtering noise in the fuel cell signal and limiting filtering of the transients in the fuel cell signal, said load following algorithm averaging the filtered fuel cell signal over a predetermined

number of sample periods, wherein the averaged fuel cell signal is combined with buffer signal to provide the extra fuel input and air input.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
